THE ARMY MEPRS PROGRAM OFFICE (AMPO)

MEPRS FUNDAMENTALS CONFERENCE

“AMPO DISCREPANCIES”

Presented by AMPO STAFF

AMPO DISCREPANCIES

- **AMPO staff perform a review of monthly transmitted MEPRS data to identify discrepancies transmitted to the EASIV Repository.**

- **MTF MEPRS personnel are expected to correct all AMPO discrepancies and retransmit corrections within 30 days after notification of discrepancy/error.**

- **All sites are requested to provide a projected timeline when all outstanding discrepancies and errors will be resolved for all fiscal years.**

- **MEPRS personnel should use the *MEPRS Code Occurrence Report* to assist in resolving the**

AMPO DISCREPANCIES

Discrepancies:

- ✓ **Unauthorized FTEs Reported in Ancillary Accounts**
- ✓ **Inpatient and Outpatient Workload with Zero/Negative Expense**
- ✓ **Zero Inpatient and Zero Outpatient Workload with Expense**

AMPO Discrepancies

- Once AMPO Analyst receives validation/research from the MTF within the 30 day suspense, ***and it is a valid justification*** the discrepancies will be identified with a "V“ and will no longer be considered a discrepancy

- Discrepancies that a "X", "N", or "R" are considered errors until the designated AMPO Analyst confirms validation, or until the site has retransmitted corrected data.

Unauthorized FTE Errors Reported in Anesthesia and Nursing Accounts

AMPO DISCREPANCIES

The majority of AMPO discrepancies are the result of

- ✓ **Failure to address Errors and/or Warnings in the Error Correction Unit**
- ✓ **MEPRS/FCC that does not meet the criteria of a standalone workcenter**
- ✓ **MEPRS/FCC was created to track a type of workload, program, patient type, etc.**
